Decision of Circuit Parameters
Selection of winding strategy and transformer constraints
Selection of transformer and winding geometry
Aspect ratio acceptable?
Y
N
$w_{\mathrm{trans}}/l_{\mathrm{trans}} = 0.25 \sim 0.75$
Calculation of winding and core losses
Losses balanced?
Y
N
Thermo-magnetic simulation of transformer
Simulation of parasitic components (capacitance and leakage inductance)
Meets requirements? (thermal, ZVS operational)
N
Y
Transformer design is acceptable
